

Fix What's Slowing Down Your Revenue Cycle

Get paid faster, with less strain on your team

For office-based physician groups, revenue cycle performance often breaks down in predictable places. Workflows vary by team. Staffing gaps slow things down. Visibility is limited, so issues go unresolved longer than they should.

The result is familiar: more denials, slower payments, and revenue that's harder to track and collect.

How we help

Most revenue cycle issues don't sit in one place. They happen between teams, systems, and handoffs.

Health Prime helps you close those gaps.

We step in where you need support, whether that's a single function like coding or A/R, or the entire front-, middle-, and back-end of the revenue cycle. We can identify and address the root causes behind performance issues, not just the symptoms showing up in one area.

Built to support complex environments

Some organizations require work to stay onshore. Others are looking for more flexible staffing models to manage cost and capacity.

We support both.

Our model combines U.S.-based, near-shore, and global teams to give you options in how work gets done. You choose the approach that fits your operational, regulatory, and financial needs without sacrificing performance.

Results you can expect

We focus on outcomes that matter day to day:

Claims move out the door faster, with fewer delays

Fewer denials due to cleaner, more consistent execution

More revenue collected from work already performed

Greater visibility into where performance is breaking down

Improve essential revenue cycle performance by fixing the parts that aren't working and strengthening the ones that are. Contact us today at hpiinc.com.
